

Transforming Animal Welfare in our Community

Progressive programs and our compassionate community result in outstanding animal outcomes.

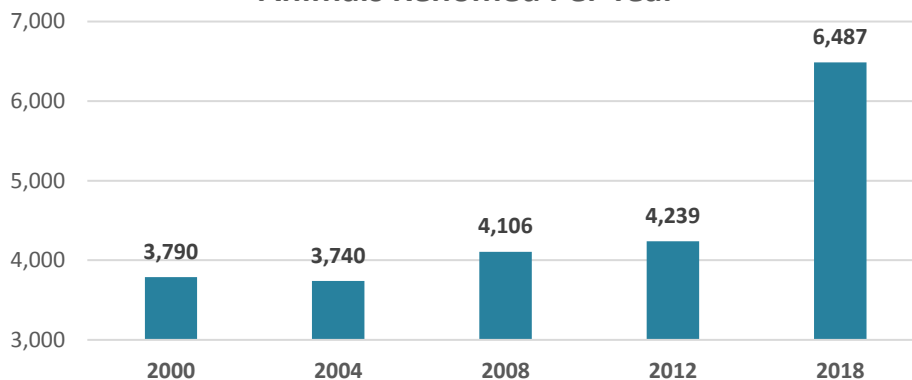

Animal 'Save Rate'

“Our progressive programs such as Foster Care, Behavior Training and Veterinary Medicine all contribute to an astounding 97% save rate.”

Dr. Jen Stonequist, DVM
Director of Shelter Medicine

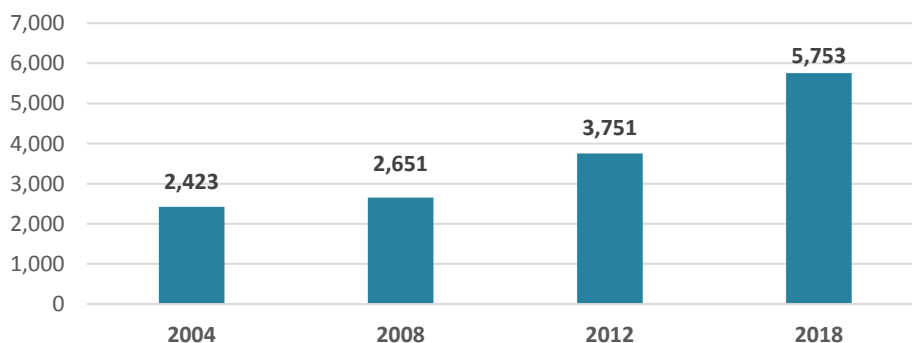

Animals Rehomed Per Year

“Comprehensive adoption programs, including off-site venues, plus effective use of marketing and social media, all help ensure our shelter animals get into new, loving homes quickly.”

Sarah Moody-Cook
Director of Animal Welfare

Spay/Neuter Surgeries

“All dogs and cats are spayed/neutered before adoption. And our low-cost program for animals from low-income households has steadily grown since its 2004 inception. High-volume spay/neuter is essential to reducing pet overpopulation.”

Eric Stevens
Executive Director
